**ATAC PATTERNS**

Atac™ patterns are developed from years of trial and error, riding, and testing. Our patterns are developed and graded according to North American fit standards. The above are fit guidelines only. Our patterns are designed to fit the widest range of cyclists possible and to work with the performance characteristics of our new generation of technical fabrics. The only way to be absolutely sure of your fit is to order a sample size set. All you pay is the shipping.

**'RAGLAN' SLEEVE VS. 'SET-IN' SLEEVE**

The above patterns are all raglan sleeve. We find that raglan is preferred by the majority of cyclists because it tends to fit a wider range of body types ...better, and it displays uninterrupted graphics and sleeve logos in the cycling position. We do have a set-in sleeve pattern available. The fit falls in between the Pro and Classic. We find that the 'Set-In' sleeve tends to fit those with wider shoulders.
